

| Problem                              | Remedies   |
|--------------------------------------|--|
| <b>Head or feet touch poles</b>      | <ul style="list-style-type: none"> <li>· Widen baseline</li> <li>· Shorten hammock suspension overall, or lengthen on contact end, shorten on non-contact end</li> <li>· Reduce headward tilt of stand by tightening foot guyline or moving stand further from foot anchor</li> <li>· Assure feet are level</li> <li>· Cross poles so ones nearest head and feet are outboard</li> </ul> |
| <b>Ridgeline sags when sitting</b>   | <ul style="list-style-type: none"> <li>· Increase stand tilt by lengthening foot guyline or moving stand closer to foot anchor</li> <li>· Sit further headward of baseline</li> </ul>  |
| <b>Ridgeline sags when reclining</b> | <ul style="list-style-type: none"> <li>· Lengthen hammock suspension. Suggested value is 6" per side for every foot shorter than 12 of hammock length</li> <li>· Increase stand tilt by lengthening foot guyline or moving stand closer to foot anchor</li> <li>· If hammock has integral ridgeline, remove or lengthen stand ridgeline</li> </ul>                                       |
| <b>Stand tips toward foot end</b>    | <ul style="list-style-type: none"> <li>· Increase stand tilt by lengthening foot guyline or moving stand closer to foot anchor</li> <li>· Shift body weight further toward head end</li> <li>· Shorten head end guyline enough to prevent tip, but <b>not</b> make taut when hammock empty</li> </ul>  |
| <b>Ridgeline is too tight</b>        | <ul style="list-style-type: none"> <li>· Shorten hammock suspension</li> <li>· Reduce stand tilt</li> </ul>  |
| <b>Sit height is too low</b>         | <ul style="list-style-type: none"> <li>· Reduce baseline width</li> <li>· Shorten hammock suspension</li> </ul>  |

| Problem  | Remedies   |
|--|--|
| <b>Anchors fail, causing stand to collapse</b>         | <ul style="list-style-type: none"> <li>· Relocate stand to firmer ground or use an alternative anchor point, such as a half body weight directly below foot apex</li> <li>· Reposition anchors as far from stand as guylines allow</li> <li>· Reduce stand tilt</li> </ul> |
| <b>Spring button missing</b>                           | <ul style="list-style-type: none"> <li>· Disassemble section to inspect inside segments; fish out and re-install</li> <li>· Avoid dropping packed stand on ends.</li> </ul>  |
| <b>Segments are jammed or won't telescope</b>          | <ul style="list-style-type: none"> <li>· Use same-diameter segment from another section to push out jammed segments before cleaning</li> <li>· Wipe down sections before collapsing in dirty conditions</li> <li>· Replace bent or damaged segments</li> </ul>             |
| <b>Connector lines are worn through more than ~10%</b> | <ul style="list-style-type: none"> <li>· Replace worn connectors</li> <li>· Assure that connector holes are not sharp</li> </ul>   |
